V3.0 · OWNER AUTHORIZED FINAL BRAND-SYSTEM BASELINE · GEM-DDS-V3.0 · ISSUED 2026-10-09

GEM™

Digital Design System V3.0

HOSPITALITY, IN PERFECT PROPORTION

Every arrival, precisely composed.

01 · OVERVIEW

Status classes and quick start

APPROVED	Final under the register. Filled ink label.
CONDITIONAL	Approved with a condition still open. 2px outline.
PENDING VALIDATION	Evidence, native QA or testing outstanding. Never present as final. Dashed 2px.
REFERENCE	Study or inspiration only. Not a GEM standard. Dotted 2px.

Also required: CONCEPT / NOT PRODUCTION ARTWORK · PENDING PRODUCTION MASTER · PENDING LOCALIZATION APPROVAL · PROJECT-SPECIFIC / REQUIRES SITE VALIDATION. Edition states, shared with Parts A and C: WORKING EDITION → RELEASE CANDIDATE (RC) → APPROVED. This edition is V3.0 RC2; it becomes APPROVED only by Brand Owner authorization (AC20).

Quick start for implementers

1. Load tokens.json or gem-tokens.v3.css / .json. Semantic tokens only, never raw hex.
2. Use the 26 components (React 18, window.GEM); each README has 11 parts.
3. Set lang and dir on the root; Arabic uses dir="rtl" with logical CSS.
4. Tracking only on capitals, at the tracking-scale values. Body and Arabic at 0.
5. Targets at least 44 × 44px. Focus ring 2px, 2px offset.
6. Label anything not approved.
7. Never invent capability, claims, approvals, prices, times, MOQs or Arabic: use [PENDING], [TO BE VERIFIED], [REQUIRES OWNER].

01 · OVERVIEW

Brand foundation (unchanged)

INK	BEIGE	BLACK	WHITE
#12171D	#BCACA7	#020202	#FFFFFF
Principal dark field and default text	Signature tone, selected fill, hairlines	Monochrome, hover and pressed fill	Canvas

Character. Precise, restrained, geometric, composed.

Principles. Precision over decoration; restraint is the luxury; geometry is the language; space is part of the identity.

Tagline. HOSPITALITY, IN PERFECT PROPORTION — fixed; set only with the tagline token (Jost 400, capitals, 0.18em); not translated without brand approval (M10). Secondary line: Every arrival, precisely composed. (Jost 400, sentence case).

Not allowed. Gradients, gold, decorative shadows, excessive rounding, SaaS styling, accent colours (Q21), and a new symbol or colour system for the Amenities & Packaging stream.

Organisation and authority

Part	Owns	This file set
A. Brand Guidelines V3.0	Strategy, identity, applications, editorial examples	Referenced; brand and identity rules govern (DS02)
B. Digital Design System V3.0	Tokens, components, patterns, accessibility, localization	This system
C. Production Standards V3.0	Dielines, materials, finishes, tolerances, supplier release	Issued as V3.0 · WORKING EDITION / PENDING PRODUCTION VALIDATION (DS04, AC17)

Authority order

1. V3 Final Brand Approval Register (Evidence Required stays conditional; Deferred stays deferred)
2. Part A, Brand Guidelines: brand strategy, identity, expression
3. Part B, this system: digital implementation
4. Part C, Production Standards: physical production
5. Formal technical and legal standards where they apply (WCAG 2.2 AA)
6. Design System v2.1, Brand Guidelines V2/2.1, V1: historical, superseded
7. External benchmarks and inspiration only (RF01–RF03)

Source of truth

Where sources conflict, the register wins. Domain ownership: where Parts A, B and C cover different implementation domains, the owning document governs that domain unless the register overrides it. Decision IDs (L09, Q17, M05…) are cited so every rule traces back. Futura PT, Montserrat, Aeonik, Satoshi and Whyte are legacy only.

Read order: slides 2–5 overview and governance → 6–21 foundations, typography, Arabic, layout, accessibility, motion, glyphs, writing, localization → 22–24 components → 25–29 patterns → 30 engineering → 31–35 QA, release, document control, assets.

Owners (all role holders TBD, AC19) and change control

Role	Responsibility
Brand Owner	Strategy, architecture, final release
Design Custodian	Master artwork, templates, assets
Commercial Lead	Buyer, offer scope, claims
Product / Amenities Lead	Range, SKU data, packaging
Procurement / Supplier QA	Dielines, materials, acceptance
Digital Design Lead	Tokens, components, responsive

Role	Responsibility
Engineering Lead	Implementation, a11y mechanics
Arabic / Localization Lead	Arabic copy, RTL, mixed language
Accessibility QA	WCAG and document verification
Legal / IP Counsel	Trademark, rights, claims
Presentation / Document QA	Deck and PDF integrity
Asset Librarian / Governance PM	Archive, manifest, versioning

Canonical role list: the register's Owners & Governance sheet, stated in Part A slide 72; this table lists digital responsibilities only. Change control. Any new token, component or variant states its purpose, register decision, accessibility check and RTL check, signed off by the Design Custodian and Digital Design Lead.

Accessibility exceptions need explicit approval (K09). Legal approval gates any claim (Y08). Suppliers may not reuse GEM artwork (Y06). Parts A, B and C share version, IDs and status (VAL-21).

Colour and semantic tokens

Foundation colours feed semantic tokens. Components read semantic tokens only.

Group	Tokens
Surface	canvas (WHITE) · signature (INK) · selected (BEIGE) · disabled (WHITE) · scrim (INK at 64%)
Text	primary (INK) · inverse (WHITE) · signatureAccent (BEIGE, on INK only)
Border	essential (INK) · decorative (BEIGE) · focus (INK) · error (INK, 2px) · disabled (BEIGE)
Action	background (INK) · foreground (WHITE) · hover / pressed background (BLACK) · disabledBackground (WHITE) · disabledText (INK)
Focus	focus-light (INK) · focus-dark (WHITE)
Feedback	errorText (INK) · successText (INK)

Light mode is primary (Q20). No full dark mode (Q19): dark contexts use the INK signature surface with gem-dark (WHITE text, WHITE focus ring).

Permitted pairings and functional status

INK with WHITE text 18.0 : 1 · K02 approved	BEIGE with INK text 8.2 : 1 · K01 approved	BEIGE on BLACK above 8 : 1 · K03 approved
BLACK on WHITE 20.8 : 1 · K04 approved	BEIGE on WHITE 2.2 : 1 · K05 prohibited for essential text	INK on BLACK near 1 : 1 · K06 prohibited

State	Label	Treatment (Q10: no functional colours)
Error	ERROR	2px border, text, optional warning glyph
Confirmation	CONFIRMED	BEIGE fill with INK text, label
Information	INFORMATION	1px border
Loading	LOADING	Decorative border, aria-busy, no time estimate

Spacing, shape, elevation and focus

Spacing scale in px. Use the nearest token, never arbitrary values. Component internals 4 to 24; section rhythm 32 to 96.

Shape

radius-editorial 0 for cards, panels, images and hero fields. radius-control 4px for buttons, inputs, selects, chips. No pills.

Elevation

No decorative shadows. Separate with 1px hairlines or colour fields. Only exception: the modal scrim, INK at 64%.

Borders and focus

Hairline 1px for controls and dividers; emphasis 2px for error, selected tab and focus. Focus ring 2px, offset 2px; INK on light, WHITE on signature.

Families (L01, L02, L04)

Aa

Jost

Display and headings. APPROVED architecture; exact build to freeze (L06, VAL-19).

Aa

Inter

Body, UI, office. APPROVED architecture; exact build to freeze.

أب

Noto Sans Arabic

Arabic. Interim (M02); final approval PENDING VALIDATION (VAL-07).

Futura PT, Montserrat, Aeonik, Satoshi and Whyte are reference or legacy only (L03, L07). No decorative serif or script (L15). The wordmark is never recreated in type (L16). Maximum two weights per composition (L08). Weights in use: 400 only until accepted font files exist; 500 WEIGHT PENDING ACCEPTED FONT FILE (Jost controlled labels, Inter, Noto Sans Arabic). Fonts are referenced under SIL OFL 1.1; exact builds, versions and deployment rights are PENDING VALIDATION (VAL-05, Y03). Licence, build and deployment control: Part C slide 15 (Font control).

Type styles

Token	Size / line	Weight	Tracking	Use
displayXL	96 / 104	400	0.12em	Hero, 1024px+, caps
display	64 / 72	400	0.08em	Page statement, caps
h1	48 / 56	400	0.02em	Page title
h2	32 / 40	400	0.01em	Section title
h3	24 / 32	400	0	Card, modal title
tagline	14 / 20	400	0.18em	The tagline
eyebrow	13 / 16	400	0.16em	Label above heading
navLabel	14 / 20	400	0.08em	Capital navigation
labelSmall	12 / 16	400	0.08em	Status, table headers
body	16 / 26	400	0	Running text (L12)
caption	14 / 20	400	0	Help text, meta
label	16 / 24	400 · 500 PENDING	0	Form labels, controls

Body measure 45 to 75 characters (max-reading 70ch, L11).

Left aligned (L13). Forced justification prohibited (L14).

Sizes in CSS px. Body stays 16px at every width.

CURRENT IMPLEMENTATION: 400 for every row. 500: PENDING ACCEPTED FONT FILE.

Tracking system (L09, L10)

EVERY ARRIVAL

displayXL · 0.12em · CONDITIONAL

EVERY ARRIVAL

display · 0.08em · CONDITIONAL

EVERY ARRIVAL

tagline · 0.18em · APPROVED

Every arrival

h1 0.02em · h2 0.01em · h3 0 · CONDITIONAL

The generic 0.3 to 0.8em rule is retired, replaced by per-style tokens. All values CONDITIONAL until optical QA in templates and native PowerPoint (VAL-19).

PowerPoint: Character Spacing › Expanded › By = em × font size in pt. Apply to the run; re-check after font substitution.

Always 0: body, caption, label and all Arabic (M05).

Prohibited: tracking on lowercase running text, on Arabic, below 12px, or to fit a word on a line. Navigation: product UI navigation is sentence case at tracking 0 (body or label tokens); navLabel tracked capitals are used only on editorial signature surfaces.

Arabic hierarchy and RTL principles

Token (M04)	Size / line	Wt
arabicDisplay	56 / 76	400
arabicH1	40 / 60	400
arabicH2	30 / 46	400
arabicH3	24 / 38	400
arabicBody	18 / 32	400
arabicLabel	16 / 26	400
arabicCaption	15 / 26	400

Rule	Decision
True RTL flow and dir="rtl" on the document	M06
Mirror composition where semantically appropriate	M07
Never mirror the GEM logo or symbol	M08
No Latin tracking on Arabic	M05
Product names translated case by case	M09
Arabic-Indic numerals for guest copy; Latin for codes, URLs, phones	M11
Standardised codes stay LTR inside RTL	M12
Bilingual default: Arabic leads for approved Saudi/GCC contexts (Arabic first and right, English secondary and left); exceptions are documented deviations	S07

Noto Sans Arabic, tracking 0, no italics, line-height at least 1.7, set larger than Latin to match x-height. Every Arabic string is a working layout string, PENDING LOCALIZATION APPROVAL; professional copyediting mandatory (M16).

Wt column = current implementation weight: 400 only. arabicH3 and arabicLabel carry 500 as FUTURE DESIGN INTENT; 500 PENDING ACCEPTED FONT FILE.

What mirrors, and mixed-language content

Mirrors	Does not mirror
Layout order, columns, navigation order	Logo and symbol
Text alignment (start edge)	Photographs, artwork
Progress direction	Clocks, play and media controls
Previous and next glyphs (only)	Search, calendar, language, check, plus, minus
Form label and input alignment	SKU, URL, email, phone, batch codes
Table column order	Numbers inside a code

Implementation. Part B owns the mechanics of the Arabic-first default (S07, Part A slide 65): dir="rtl", logical properties only (margin-inline-start, text-align: start, inset-inline), bidi isolation. No left or right in component CSS. Fabrication follows Part C slide 41.

Mixed language. Wrap embedded Latin in <bdi> or a dir="ltr" span. Codes like GEM-[PENDING] stay LTR and separated.

Focus. Tab order follows reading order; Left and Right swap in tablists and date grids. The focus ring is symmetric.

04 · LAYOUT

Breakpoints (Q17, approved)

Band	Width	Columns	Gutter	Margin	Behaviour
Compact	0–479	4	16	16	Single column. Nav collapses. Primary action full width.
Mobile	480–719	4	16	24	Single column; two-up only for glyph grids and image pairs.
Tablet	720–1023	8	24	32	Two-up cards. Navigation may stay collapsed.
Desktop	1024+	12	24	48	Content max 1080px. Full navigation.
Wide	1440+	12	24	48	Content max 1280px, centred. Not a separate model.

Columns, gutters, margins and max widths are CONDITIONAL until validated in templates. Type scaling (CONDITIONAL): Display XL 96 at 1024px+; step-downs 64 at 720px, 48 at 480px, 40 at Compact. Body stays 16px.

04 · LAYOUT

Behaviour by component family

Family	Compact and Mobile	Tablet	Desktop and Wide
Page	One column, margins 16 or 24	8-column grid	12 columns, max 1080/1280
Type	Display steps down; body 16px	Display 64	Display XL 96
Cards	Stacked, full width	Two-up	Three- or four-up
Navigation	Disclosure; 44px targets	Collapsed or inline	Inline, primary visible
Modals	Full width minus 24px; actions stack	Centred, max 440	Centred, max 440
Forms	Single column, labels above	Optional two-up	Two-up for paired fields
Tables	Scroll in a labelled region, or restack	Horizontal scroll	Full table

Reflow at 320 CSS px and 400% zoom without two-direction scrolling (WCAG 1.4.10). Never fix heights on text. Remove content before reducing space. Align to the start edge; trim trailing tracking when centring capitals.

Requirements and where they live

Requirement	Rule
Contrast	Text 4.5:1; large text, UI 3:1
Not by colour	Text, weight or glyph (V10)
Target size	44 × 44 CSS px (V12)
Focus	2px ring, 2px offset (V08)
Keyboard	All operable, no traps (V09)
Location	aria-current="page"
Selection	aria-selected / aria-pressed
Invalid	aria-invalid + describedby
Alerts	role=alert; else role=status
Loading	aria-busy, no invented time

Requirement	Rule
Dialogs	Focus in, trapped, Esc, returns
Disabled	aria-disabled, reason in text
Tables	th scope, caption
Links	Descriptive; announce new window
Images	Alt text (V02); decor hidden (V03)
Motion	Reduced motion: 0ms (V11)
Language	lang on document and runs
Order	Logical DOM, also RTL (V05, V14)
Required	Marked in text; native required
Focus order	Matches visual reading order

Per release: axe-core, keyboard-only, screen reader in English and Arabic, 400% zoom, 320px reflow, reduced motion, forced colours. Official PDFs tagged (V13); signage legibility-tested (V15).

Motion tokens

Token	Value	Use
duration-instant	0ms	All, under reduced motion
duration-hover	150ms	Hover colour change
duration-confirmation	180ms	Confirmation appearing
duration-modal	200ms	Modal appearing
duration-reveal	1500ms	Full mark reveal (P02)
reveal-ring *	900ms from 0	Ring draws on
reveal-spark *	200ms from 900	Spark flashes
reveal-quarter *	400ms from 1100	Quarter fills
easing-out	cubic-bezier(0.22, 0.61, 0.36, 1)	Only easing; reversed for exits

All APPROVED except * CONDITIONAL.

No bounce, elastic, overshoot, parallax or autoplay loops. Motion explains a change, never decorates. UI controls animate opacity and colour only.

Reduced motion: every duration to 0; keep the state change, drop the movement.

Motion masters PENDING VALIDATION (VAL-14).

05 · GLYPHS (Z11)

Functional Glyph System

27 outline glyphs: 24px optical box, 2px stroke, square caps, miter joins, ink only (currentColor). Sizes 16, 20, 24, 32. No fills, gradients or two-tone. A glyph never replaces a text label on its own.

Category	Glyphs	Status
Interface	close, previous, next, expand, collapse, check, plus, minus, calendar, search, download, external, language	CONDITIONAL (VAL-13)
Contact, guest	location, phone, email, guest, bed	CONDITIONAL
Amenity	accessibility, wifi, dining, spa, pool, fitness, transport	PENDING VALIDATION
Status	currency, warning	PENDING VALIDATION

Optics. Shapes sit 2px inside the box; round shapes overshoot 0.5px. Never scale to change the stroke.

Accessibility. Decorative glyphs aria-hidden; standalone glyphs get a label. Targets 44px.

RTL. Only previous and next mirror. SVGs are working geometry, not supplier artwork (DS05). The warning glyph is PENDING VALIDATION and is used only inside Field error and Alert text until functional colour is decided (Q10); Alert has no warning variant.

Voice and feedback hierarchy

Voice (G01–G10). Measured. Warm, not effusive. Quietly confident. Short sentences. State rather than sell. No exclamation marks, no unsupported superlatives.

Use: arrival, stay, proportion, composed, measured, quiet, exact, welcome, crafted.
Avoid: luxurious, world-class, indulge, oasis, escape, pamper, unforgettable, best.

1. State label	2. Title	3. Actionable sentence
ERROR	Availability has changed.	Review your room selection.
CONFIRMED	Booking confirmed.	Reference: [booking ID].
LOADING	Checking availability…	No estimated completion time is available.
INFORMATION	Request received.	We'll confirm the delivery time here.

Field errors state the fix. "Invalid date" → Choose an arrival date before the departure date.

Buttons and links. Sentence case, outcome verbs, one primary per view. Never "Click here".

Examples by journey

Context	Example	Note
Booking	Review booking · Choose your dates · Keep dates	Verbs naming the outcome
Room	[Approved room name] · [Size], [Bed type], [Occupancy]	Facts from the property
Dining	Reserve a table · [Venue] · Seating for [number]	No availability promise
Recovery	We're sorry the room wasn't ready. We have noted it and [action].	No compensation stated
Amenities	Request samples · Core collection · Property edition	Approved product list
B2B inquiry	Tell us about your property or project. We'll reply to [email].	No response time
Quotation	Request a quotation · Quotation reference: [ID]	No price until supplied
Delivery	Replenishment programme: [TO BE VERIFIED]	No MOQ, schedule or lead time

Locale tokens and date picker

Token	Value	Status
locale-source	en	APPROVED
locale-arabic	ar-SA	PENDING VALIDATION
numerals-technical	latn	APPROVED
numerals-guestArabic	arab	CONDITIONAL
calendar-default	gregory	CONDITIONAL
currency-format	[REQUIRES OWNER]	Localization Lead; no price invented

- Format with Intl.DateTimeFormat and Intl.NumberFormat; never concatenate.
- Week start from Intl.Locale weekInfo; never hardcoded.
- Latin digits for SKUs, codes, URLs and phones (M11, M12).
- Allow 30–40% text expansion; no fixed label widths.
- Hijri display: [REQUIRES OWNER: Arabic / Localization Lead].

DatePicker. Props: locale, mode (single or range), ISO value, min, max, isUnavailable, firstDay, showText. A text summary states the selection; selected cells have a 2px border; unavailable dates are struck through with text in the name; arrows swap in RTL; range filled BEIGE with INK text (8.2:1).

Component index: Alert to Link

Component	Purpose
Alert	State label, title, actionable sentence
Button	One action; one primary per view
Checkbox	Independent yes or no choices
DatePicker	One date or a range, by locale
Disclosure	Reveals terms or product care
EmptyState	Explains empty; offers next step
Field	Collects one short text value

Component	Purpose
FilterChip	An applied, removable filter
Glyph	One functional glyph
IconButton	Compact glyph control, named
LanguageSelector	Switches language and direction
Link	Navigates; underlined, 400, ink
Modal	A decision that blocks the page
Navigation	Moves between sections

26 components in components/, exposed as window.GEM (React 18), typed in index.d.ts. Each README: Purpose, Anatomy, Tokens, Variants, States, Content, Accessibility, Responsive, RTL, Do/Don't, Code.

Component index: ProductCard to ToggleButton

Component	Purpose
ProductCard	One SKU in approved hierarchy
Progress	Progress without implying time
QuantityStepper	Guests, rooms, units, quantity
RadioGroup	Exactly one from a short set
RoomCard	One room, verified facts
SearchField	Finds content or products

Component	Purpose
Select	One from a short fixed list
SpecificationTable	Controlled spec as a real table
StatusLabel	Approval status of an item
Tabs	Switches views in place
Textarea	Free text: brief or note
ToggleButton	One choice on or off

Tokens and behaviour APPROVED in principle; implementation CONDITIONAL on VAL-13 and VAL-20. Every preview shows English and Arabic, the Arabic flagged PENDING LOCALIZATION APPROVAL.

Evaluation matrix

Check	Result
Semantic tokens only	Pass: automated scan, no raw colour variables
44px minimum targets	Pass in all previews; checkbox and radio rows are the 44px target
Focus ring light/dark	Pass by token; dark surfaces use gem-dark
Keyboard operation	Scripted for Tabs, DatePicker, aria-disabled Button; screen reader PENDING (VAL-08)
RTL	Logical properties, dir="rtl" previews; native QA PENDING (VAL-07)
Reduced motion	Transitions removed under the media query
Not colour alone	State label, border weight, glyph and text on every state
Console and axe-core	No errors or violations; known harness notes only

"Tested" means a local render harness (Chromium, axe-core 4, scripted keyboard), not an independent QA team. Not yet included: destructive button, toast, tooltip, popover, sortable table, file upload, carousel, date-time picker, full dark theme.

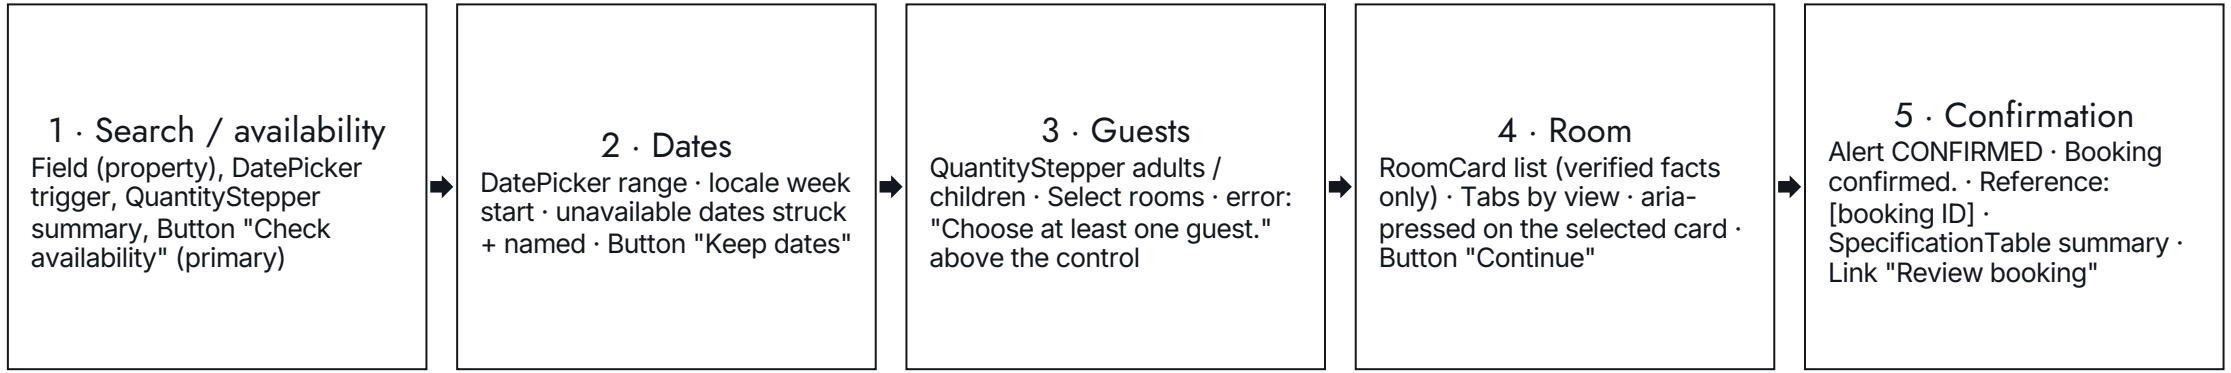

Hospitality patterns

Pattern	Components · status
Booking flow	Field, Select, DatePicker, Stepper, Button · CONDITIONAL
Room selection	RoomCard, SpecificationTable, Tabs · PENDING
Confirmation	Alert (CONFIRMED), table, Link · [booking ID]
Concierge, arrival	Navigation, Field, Button, Disclosure · PENDING
Dining	Navigation, Tabs, Field, DatePicker · pricing [PENDING]
Service recovery	Alert, Button · [action] from the property
Email	Type scale, Button, Link · Arial or system-ui fallback · email template: OPEN DELIVERABLE (R13, AB11)
Presentations	PowerPoint master: OPEN DELIVERABLE (W01, AB10), not yet produced · native QA PENDING (VAL-15)

Page anatomy

1. Header: logo (min 120px, H10), navigation, language
2. Content band: eyebrow, heading, one sentence, one action
3. One oversized ring or quarter cropped off the edge; never touching the logo; one spark at most
4. Footer: language, legal [PENDING], contact [REQUIRES OWNER]

Booking flow: five steps, one primary action each

Primary action
One primary Button per step, full width at Compact; secondary actions are Links. Focus moves to the step heading on step change, to the first invalid field on error.

Errors and validation
State label ERROR, title, actionable sentence (feedback hierarchy). Inline field errors above the control with aria-invalid and aria-describedby; never colour alone.

RTL / Arabic
dir="rtl" on the root: step order and arrows read right to left; DatePicker arrows swap; codes and the booking ID stay LTR in <bdi>. Arabic strings are working placeholders, PENDING LOCALIZATION APPROVAL.

Responsive
Compact: one column, stacked actions, DatePicker as full-width sheet. Desktop: two-up for dates and guests (Tablet) and a room list at 12 columns; max 1080 / 1280.

Status
CONCEPT / IMPLEMENTATION TEST. Not a live product. Step logic, focus, error and RTL behaviour are specified here and in 02_build/flow; runtime behaviour is NOT TESTED until the component bundle exists (VAL-13, VAL-20).

GEM™ — Amenities & Packaging

A descriptive stream under the master brand, not a sub-brand: no new symbol, colour system or stream logo. Hierarchy (T04, T05), six levels: GEM → collection or tier → product and function → quantity → instructions → SKU and artwork version; Part A slide 61 and Part C slide 29 state the same. Pilot family (T02): Shampoo, Conditioner, Body Wash, Body Lotion, Hand Wash. Whether a family name such as "Bath and body" may occupy the collection/tier level is [REQUIRES OWNER · Product / Amenities Lead]; tiers are CONDITIONAL (AC03, VAL-01).

Field	Rule	Status
Name and function	Functional, English; Arabic per T11	CONDITIONAL
Quantity	Metric first: mL, g, count (T06)	CONDITIONAL
Instructions	From verified data only	[PENDING]
Ingredients	Regulated; verified data only (T10)	[PENDING]
Batch / lot · GTIN	Controlled fields where required (T07, T08)	Reserved
Country of origin	Where required; verified per SKU (F06, T09)	[TO BE VERIFIED]
Arabic	Mandatory for Saudi market unless exempted (T11)	PENDING VALIDATION
SKU and artwork version	Printed and held in records (T22)	[PENDING]

Imagery and art direction

Direction · owned by Part A

Photography direction is governed by Part A slides 47–50 (O01–O10). This system keeps only the digital rules: crops and ratio tokens, alt text, rights metadata and the avoid list.

Crops and grade

Subject on a third; a quarter of the frame empty; crop to an edge, not through it. Whites slightly warm, blacks lift to INK; never push BEIGE to gold.

Avoid

Generic stock (O02), posed smiling guests (O03), oversaturation, filters, artificial glow, gold highlights, text over busy areas.

Required categories per the register (O11–O16) and Part A slide 48: architecture, material detail, arrival and threshold, amenities and product; dining and service where relevant. Every production image carries rights metadata (O18, VAL-06); AI or rendered mockups are never presented as photography (O17). Ratio tokens: 3:2 rooms, 4:5 products, 16:9 hero (CONDITIONAL).

Wayfinding and environmental identity

Principle	Rule
Hierarchy	Lobby (S03), directional (S04), room-number (S05), amenity and facility (S06)
Bilingual order	Arabic first and right, English secondary and left, equal information: the default for Saudi/GCC (S07, Part A 65). Exceptions only by documented project deviation (Part C 41, Appendix K)
Glyphs	32px minimum in digital (H11); signage needs its own validated set
Contrast	INK on WHITE or BEIGE; WHITE or BEIGE on INK; never BEIGE on WHITE
Type	Jost capitals for headings; Inter for instructions; Noto Sans Arabic (interim)
Accessibility	Tactile and Braille where required (S08, S09); legibility testing (V15)
Geometry	One oversized ring or quarter per surface at most; never behind text

Viewing distances, letter heights, illumination, materials and mounting are [REQUIRES SITE VALIDATION] and belong to Part C. External signage Deferred (S02).

Token architecture and implementation

```
EXCERPT — full set: gem-tokens.v3.0.json / .css
foundation.color
ink #12171D · beige #BCACA7
black #020202 · white #FFFFFF
semantic
surface · text · border
action · focus · feedback
type · space · radius · size
motion · layout · locale
```

- Source: tokens.json (living source, DS03 open); portable gem-tokens.v3.0.json and .css (--gem- prefix), derived from this specification with status per token. Aliases use {path}.
- Semantic HTML first; ARIA only where no native element exists.
- CSS custom properties for every token; logical properties for direction.
- Every string is a prop; Intl for dates and numbers.
- :focus-visible with focus tokens; modal traps and returns focus.

Storybook-ready (DS03, VAL-20): tokens/ · components/<Name>/ (tsx, css, stories, README, test) · docs/. Stories show every state, EN and AR, reduced motion, 320 and 1440px. Versioning: semantic 3.0.0 (document edition V3.0).

Final QA audit (self-audit against the V3 brief)

Area	Result	Notes
Brand	Pass	Palette, tagline, logo unchanged; no gradients, gold, shadows
Consistency	Pass	One status vocabulary; tokens everywhere; one README template
Accessibility	Pass, open	Rules in place; screen reader and Arabic order untested (VAL-08, V14)
Responsive	Pass, open	Five bands defined; template validation outstanding (VAL-20)
Localization	Open	Arabic working strings only; native QA not started (VAL-07)
Content	Pass	Placeholders for every unverified fact; no invented claims
Production	Open	Vector logo kit received, acceptance pending; no supplier data; Part C issued as V3.0, physical evidence open (VAL-02, VAL-09 to VAL-11, AC17)
Governance	Open	Role holders TBD (AC19 formally deferred); release authorization issued with formal deferrals (AC20)
Implementation	Open	Reference bundle; no independent QA or Storybook (VAL-13, DS03)
Quality	Pass, open	Tracking values CONDITIONAL on optical QA (VAL-19)

Open validation gates

Release checklist and change log

1. All role holders named.
2. VAL-02 to VAL-07 closed or formally deferred.
3. VAL-08, VAL-13, VAL-19, VAL-20 closed.
4. Arabic signed off or explicitly excluded (AC10).
5. Production specifications approved (AC17).
6. Cross-document check against Parts A and C (VAL-21).
7. Release manifest and checksums (VAL-16).
8. Brand Owner authorization (AC20).

3.0.0 · V3.0 (this edition)

Added: tracking scale, Arabic hierarchy, semantic tokens, layout tokens, 27 glyphs, 26 components (from 12), locale DatePicker, feedback hierarchy, Amenities & Packaging, imagery studies, QA audit.

Changed: Futura PT and Montserrat to reference; 0.3–0.8em tracking retired. Removed: unconditional manufacturing statements.

2.1: initial system from brand guidelines and digital tokens.

Document control and change log

1. Document ID · GEM-DDS-V3.0
2. Title · GEM™ Digital Design System V3.0 — Part B
3. Version · V3.0 (final brand-system baseline) · semantic 3.0.0
4. Edition state · OWNER AUTHORIZED FINAL BRAND-SYSTEM BASELINE · SPECIFICATION ONLY, NO COMPONENT IMPLEMENTATION
5. Issue date · 2026-10-09
6. Owner · Digital Design Lead [REQUIRES OWNER]
7. Approver · Brand Owner · AC20 AUTHORIZED WITH FORMAL DEFERRALS
8. Release status · Owner authorized baseline, synchronized with Parts A and C · formal deferrals recorded; release-checklist items (slide 33) deferred, not closed · evidence gates open or deferred
9. Supersedes · V3.0 working specification, 3.0.0-draft (undated)
10. Related · GEM-BG-V3.0 (Part A) · GEM-PS-V3.0 (Part C) · V3 Approval Register

Change log

3.0.0 · 2026-10-09 · release labels only; no content, token or layout change.
3.0.0-rc.2 · 2026-10-06 · RC2 synchronization with Parts A and C and the register: version and document ID; authority order and domain ownership; stale Part C references; register role names; one navigation rule; S07 bilingual default with exception rule; six-level hierarchy cross-reference; family-name policy placeholder; T13 wording; template gates; VAL-18 note; X12 naming; currency placeholder; photography cross-reference; token excerpt label; warning-glyph note; booking-flow test; document control. No token, component or rule value changed.

3.0.0-draft. Updated from v2.1 under the V3 register: tracking scale, Arabic hierarchy, semantic and layout tokens, 27 glyphs, 26 components, locale DatePicker, feedback hierarchy, Amenities & Packaging, QA audit; Futura PT and Montserrat to reference; 0.3–0.8em tracking retired.

2.1: initial system from brand guidelines and digital tokens.

Logos

File	Ink	Use
gem-horizontal-beige.svg	BEIGE	Signature lockup on INK
gem-horizontal-black.svg	BLACK	Monochrome lockup on white
gem-horizontal-white.svg	WHITE	Reversed on INK or black only
gem-symbol-beige.svg	BEIGE	Standalone symbol on INK
gem-symbol-black.svg	BLACK	Standalone symbol on white

Rules (H10–H15). Lockup min 120px; symbol min 32px; below that the no-spark symbol (H12; supplied in the kit). Clearspace u = G-ring radius, min 1u, preferred 2u. Never mirror (M08) or recreate in type (L16).

Also in the kit: ink and white colourways, stacked lockup, no-spark symbol, clearspace versions, PDF, EPS and PNG, favicon and app icons (H16–H20). Renamed to GEM_[STREAM]_[ASSET]_[VARIANT]_vX.Y_YYYYMMDD.ext (X12) at first manifest (VAL-16), never redrawn. Embroidery and deboss masters not supplied. Acceptance PENDING (VAL-02).
