GEM

PART E · PRODUCT-LINE GUIDELINES · WORKING EDITION

GEM™ — Amenities & Packaging

Part E: product-line guidelines for naming, label information, design, evidence gates and messaging.

WORKING EDITION

RELEASE: NOT AUTHORIZED

Document ID: PENDING ASSIGNMENT · Working revision 04 · 18 October 2026 · English first

HOSPITALITY, IN PERFECT PROPORTION

Supplements Parts A–D. Does not replace them.

THIS DOCUMENT

- Applies the released V3.0 baseline to the Amenities & Packaging line.
- Implements the English naming approved on 18 October 2026.
- Proposes line-specific requirements where Parts A–D leave gaps. Each proposal is tagged and stays a proposal until accepted.

THIS DOCUMENT DOES NOT

- Replace master identity rules.
- Approve product specifications or artwork.
- Establish regulatory compliance.
- Authorize publication or website changes.

CONTROL FIELD	VALUE
Designation	Part E · Amenities & Packaging product-line guidelines
Document ID	PENDING ASSIGNMENT
Final issue version	PENDING ASSIGNMENT
Edition state	WORKING EDITION
Release	NOT AUTHORIZED
Working revision	04 · 18 October 2026
Language	English. Arabic: approval workflow only, no approved Arabic text

Register precedence and domain ownership.

CONFLICT RULE (PART B SLIDE 4)

Where sources conflict, the Approval Register wins. Where Parts A, B and C cover different domains, the owning document governs its domain unless the register overrides it.

DOMAIN	GOVERNING SOURCE
Identity and expression	Part A
Digital implementation	Part B
Physical production	Part C, within its retained validation status
Concepts	Part D records concepts only
Product-line application	Part E, this document: subordinate; proposals stay proposals
Legal, regulatory and technical standards	The applicable authority or standard (for example WCAG 2.2 AA). Brand rules do not override them.

TAGS USED ON FOLLOWING SLIDES

INHERITED — Taken from Parts A–D. Cited by slide number.

APPROVED — Covered by an owner decision (for example the 18 Oct naming approval).

PROPOSED — New to this document, with its PE ID. A proposal cannot close an evidence requirement or amend a master rule.

Approval of this document does not approve individual claims, images, product data or publication.

One identity across guest amenities and packaging.

A coherent hospitality amenities and packaging system. Consistency comes from identity, information hierarchy and application, not from invented collections or unsupported product claims.

Audience: hospitality owners, developers, operators and procurement teams in Saudi Arabia and the wider GCC.

That audience is a statement of who the line addresses. It is not a promise of distribution, supply or regulatory clearance in those markets.

GEM IS	GEM IS NOT
• A hospitality supplier and partner. • One master brand, applied the same way everywhere. • Precise, restrained and specific in what it says. • Bilingual by design for Saudi/GCC hospitality.	• A hotel operator. • A decorative luxury brand. • A family of separate sub-brands. • A source of unverified claims.

INHERITED · PART A 12–13

Portfolio: controlled names and what each may mean.

LAYER	CONTROLLED NAMING	APPLICATION	TAG
Master brand	GEM™	Fixed identity across the portfolio	INHERITED
Descriptive stream	GEM™ — Amenities & Packaging	A descriptor, not a sub-brand. No separate logo, symbol or palette.	INHERITED
Baseline description	Consistent GEM range	B2B comparison copy. Not a printed collection name or a required pack line.	APPROVED
Five pilot products	Shampoo · Conditioner · Body Wash · Body Lotion · Hand Wash	Exact English names. They do not establish formula, quantity or availability.	APPROVED
Additional concept category	Bar Soap	Outside the five-product pilot count. “bar soap” in running prose.	PROPOSED
Concept packages	Room set · Wall-mounted set · Travel set	Keep: “Concept · supplier proof required”. Contents and capacities not approved.	APPROVED
Programmes	Property Edition · Bespoke Programme	Keep: “Being defined; scope and availability pending.”	APPROVED

Core Collection and Standard Range are not adopted.

Naming rules: exact names, exact case.

DO	DON'T
"Room set", "Wall-mounted set", "Travel set": sentence case, keep the hyphen.	"Room Set", "Wall Mounted Set".
"Property Edition", "Bespoke Programme": title case, British spelling.	"Bespoke Program".
"Consistent GEM range" in B2B comparison copy.	Print it on a pack as a collection name.
Omit Level 02 on baseline packs.	Print "[COLLECTION / TIER PENDING]".
Use "GEM™ — Amenities & Packaging" for the descriptor.	Invent a stream logo or a sub-brand name.

Any new name needs a new owner naming decision. Naming never approves contents, capacities, availability or commercial terms.

APPROVED · NAMING 18 OCT 2026

Six levels. Order never reversed.

01	GEM master artwork Supplied kit, unchanged
02	Collection or tier OMITTED on baseline packs
03	Product and function Approved product name; function only when verified
04	Quantity / size [PENDING] until verified
05	Instructions and market information [PENDING]; product, linguistic and legal review
06	SKU and artwork version [PENDING] controlled identifiers

INHERITED · PART A 61

APPROVED · LEVEL 02 OMITTED

RULES

- Part A defines the six levels and their order. This document does not replace them.
- Omitting Level 02 does not allow another element to move into that position as an invented collection.
- The omission applies to baseline packs. A programme that later receives its own scope approval may use Level 02.
- Concept artwork may show [PENDING], clearly disclosed. Consumer-ready labels must carry approved information, never placeholders.
- Pending fields are never filled with invented values.

Four shared pillars, applied the same way to every item.

01

Precision

Use controlled artwork, exact product names and a consistent information order.

02

Restraint

Preserve the six-level hierarchy; omit Level 02 on baseline packs. Remove unsupported descriptors and decorative badges.

03

Geometry

Follow the approved mark geometry and a supplier-verified packaging drawing.

04

Space

Preserve master clearspace and readable separation between information groups.

Part A character: precise, restrained, geometric, composed. Part B principles: precision over decoration; restraint is the luxury; geometry is the language; space is part of the identity.

INHERITED · PRINCIPLES · PART A / B 3

PROPOSED · APPLICATIONS · PE-21

Quick reference: palette and type. Cited, not redefined.

INK	BEIGE	BLACK	WHITE
#12171D	#BCACA7	#020202	#FFFFFF

- Pairings: INK on WHITE 18.0:1 · BEIGE on INK 8.2:1 · BLACK on WHITE 20.8:1.
- Never BEIGE on WHITE (2.2:1) for essential text or the logo.
- Not allowed: gold, gradients, decorative shadows, a fifth colour, accent colours.

Colour-coded labels are not part of the current system. If the owner wants them, the route is an amendment to the master guidelines through the Approval Register. This document cannot grant an exception.

ELEMENT	RULE
Display and headings	Jost, weight 400
Body and UI	Inter, weight 400
Arabic	Noto Sans Arabic, interim · PENDING VALIDATION
Weights	400 only until accepted font files exist
Tracking	Capitals only, at token values. Body, caption, label and Arabic: 0
Tagline	HOSPITALITY, IN PERFECT PROPORTION · caps · Jost 400 · 0.18em · never shortened or lowercased

INHERITED · PART B 3, 6–11

Physical standards and imagery: specification before appearance.

PHYSICAL

- Warm uncoated stock, matte direction: feel before shine.
- Avoid decorative gold, holographic, chrome, heavy foil, gloss-heavy cues.
- Finish suppliers, stock weights, tolerances: [REQUIRES OWNER], Part C.
- Bottle appearance (round-shouldered cylinder, black pumps, amber and ivory) is a visual proposal only. Lock to a supplier drawing before production artwork.
- SKU specification records substrate, grade, finish, adhesive, decoration method. No unverified material or recyclability claims.

IMAGERY

- Classify every image: concept render, production photography or source artwork.
- A realistic render is never presented as production photography.
- Alt text states concept status and describes the content. A caption does not replace alt text.
- Disclosure stays visible near the image and readable on narrow screens.

CONCEPT / NOT PRODUCTION ARTWORK

CONCEPT / NOT PRODUCTION PHOTOGRAPHY

Proposed deliverables: 4:5 product and 16:9 hero, with a separate narrow-screen composition when a shared crop would hide the product or its disclosure.

CONDITIONAL · PROPOSED

Digital behaviour is inherited from Part B.

RULE	VALUE (PART B)
Radius	0 editorial · 4px controls · no pills
Separation	1px hairlines. No decorative shadow.
Focus ring	2px, offset 2px · INK on light, WHITE on dark
Target size	44 × 44 CSS px
Motion	One easing. No bounce, parallax or autoplay loops. Reduced motion honoured.
Breakpoints	480 · 720 · 1024 · 1440. Body stays 16px.
Buttons	Sentence case, outcome verbs, one primary per view

DO	DON'T
Name the real action: "Draft enquiry".	Imply submission when only a draft exists.
Show concept images with a disclosure.	Let a hero image carry unverified product facts.
Keep ring or quarter forms off headlines.	Put a ring behind text.
Describe what the implementation actually does.	Copy another build's approved wording as proof.

This document does not authorize website redesign or implementation.

No product tiers are approved. Use development routes.

Part A keeps tiers CONDITIONAL until commercial scope closes (AC03, VAL-01). The naming approval gave baseline packs no collection name and did not adopt Core Collection or Standard Range. Property Edition and Bespoke Programme are not automatically superior formulations or performance levels.

GATE	BASELINE PACKS	PROPERTY EDITION	BESPOKE PROGRAMME
Master identity	Fixed	Fixed	Fixed
English product naming	Controlled	Controlled	Controlled unless separately approved
Property identity	No property-specific application established	Proposed under agreed co-branding rules	Determined by an approved brief
Packaging structure	Supplier proof pending	Adaptation scope pending	Development scope pending
Formula, volume, material	Verified per SKU	Verified per SKU	Verified per SKU
Commercial availability	Not established by naming	Pending	Pending
Release gate	Approved SKU evidence	SKU evidence + co-branding approval	SKU evidence + brief and development approval

PROPOSED · PE-22

Feature prioritisation: a method, not scores.

SCORE	CUSTOMER IMPACT	TECHNICAL EFFORT
1	Minor preference	Controlled artwork change
3	Meaningful operational improvement	Supplier tooling or compatibility work
5	Essential guest or operator need	New formulation, structure or qualification programme

- Record evidence, dependencies and validation cost beside each score.
- Safety, legal requirements and basic usability are mandatory gates, never premium features.
- An unverified performance improvement receives no promotional claim, whatever its score.

DATA STILL MISSING

- Supplier cost and lead-time inputs.
- Buyer research with hospitality procurement.
- Owner decision on scoring criteria and weights.

Without that data any score would be invented. No scores are given in this edition.

PROPOSED · PE-23

Evidence gates (1 of 2): product and formula.

Exact legal requirements depend on product classification, formulation, intended use and destination market. A competent regulatory reviewer establishes them. This document does not certify compliance.

GATE	REQUIRED EVIDENCE	ACCEPTANCE CONDITION
Product identity	Controlled SKU record, intended use, formulation reference	Records identify the same product and revision
Regulatory assessment	Market-specific classification, requirements, clearance record	Applicable obligations resolved by the authorised reviewer
Formula safety	Qualified safety assessment and applicable test reports	Approved criteria met; no unresolved critical findings
Product stability	Approved stability and packaging-compatibility protocol	Results meet predefined limits for the intended shelf life
Microbiological quality	Applicable testing and preservation evidence	Qualified reviewer accepts results against the approved protocol

Do not invent universal cycle counts, shelf lives, doses or temperature limits. Set numeric thresholds before testing, with the responsible technical reviewer and supplier.

PROPOSED · PE-24

Evidence gates (2 of 2): packaging and artwork.

GATE	REQUIRED EVIDENCE	ACCEPTANCE CONDITION
Dispensing system	Closure fit, leakage, priming and dose-consistency results	Supplier-agreed numerical limits met
Label durability	Adhesion, wet exposure, abrasion and legibility testing	Approved protocol passed on the actual substrate and print process
Transport packaging	Distribution-specific protection testing	Approved damage and leakage limits met
Traceability	Batch identification and controlled manufacturing records	Product traceable to relevant production evidence
Artwork	Verified copy, facts, mark, fonts and required information	Final proof approved for the exact SKU and market

Each release record identifies the artifact revision, full checksum, evidence references, reviewers and the authorised final approver. An unassigned approval route is a blocking item.

PROPOSED · PE-24

Label, localization, digital and rights controls.

CONTROLS

Do not print unverified volume, formulation, certification or Arabic wording. INHERITED · A22

Generated mockups never become production artwork. PROPOSED · PE-09

Arabic: source terminology, qualified translation, native review, shaping, font and RTL checks, final artwork approval. PROPOSED · PE-15

Digital artifacts: WCAG 2.2 AA with the Part B test list (axe-core, keyboard, screen reader EN and AR, 400% zoom, 320px reflow, reduced motion). INHERITED · B16

Rights: image rights register (VAL-06) and font licence (VAL-05) before publication. INHERITED · B28, B32

CANDIDATE REFERENCES · TO BE VERIFIED

- ISO 22716 · cosmetics good manufacturing practice
- ISO 11930 · antimicrobial protection of a cosmetic product
- ISO 29621 · microbiological risk and low-risk products
- ISO 17516 · microbiological limits
- ISTA or ASTM D4169 · distribution testing
- SFDA cosmetics requirements and GSO standards (secondary sources cite GSO 2528:2016 for claims)

A prompt for the reviewer, not requirements. Saudi label rules came from consultant and testing-body summaries and must be checked against SFDA and GSO primary texts.

PROPOSED · PE-27

Voice: measured, warm, quietly confident.

Measured

Short sentences. No hurry.

Warm, not effusive

Welcome without exclamation.

Quietly confident

State rather than sell.

Precise

Facts, verified. Never an adjective in place of one.

USE

arrival · stay · proportion · composed · measured · quiet · exact · welcome · crafted

AVOID

luxurious · world-class · indulge · pamper · oasis · escape · unforgettable · best

No exclamation marks. No unsupported superlatives such as “leading” or “number one”.

INHERITED · PART A 19–20

Do and don’t: exact contrast pairs.

DO	DON’T
“Room set — concept; supplier proof required.”	“Your complete, ready-to-order bathroom solution.”
“Scope and availability pending.”	“Available now: Property Edition.”
“GEM is developing guest amenities and packaging…”	“We are the leading amenity manufacturer.”
“Creates text for you to copy. Nothing is sent.” (where true)	“Enquiry sent.” when only a draft exists.
“[PENDING] mL” on clearly disclosed concept artwork.	“300 ml” copied from a mockup.
“Consistent GEM range.”	“Core Collection” or “Standard Range”.

PROPOSED · PE-25

Positioning frame and signature.

ELEMENT	STATEMENT
Audience	Hospitality owners, developers, operators and procurement teams
Category	Amenities & Packaging, a descriptive stream under GEM™
Value	A consistent identity across guest amenities and packaging
Method	Precision, restraint, geometry and space
Proof	Approved, artifact-specific evidence only. Not generated imagery or aspiration. [PENDING]

“For hospitality owners, developers, operators and procurement teams, GEM is a hospitality supplier and partner bringing guest amenities and packaging under one identity.”

PROPOSED SENTENCE · PE-26

SIGNATURE

HOSPITALITY, IN PERFECT PROPORTION

- Fixed. Capitals, Jost 400, 0.18em.
- Never shortened or lowercased. Use the approved tracking value unchanged.
- Never a measurable performance promise.
- Secondary line: once per composition, never at equal weight beside the primary.

Claims register: one claim per row.

FIELD	PURPOSE
Exact wording, intended use	Prevents paraphrased approval
Product, market, channel scope	Bounds where the claim applies
Controlled status; decision status	Separates evidence state from adoption
Full-revision evidence reference	Makes the record locatable
Reviewer; final-approver role	Separates review from authorisation
Acceptance evidence; approval reference	Defines what closes the gate

CONTROLLED STATUS

APPROVED	Final under the register
CONDITIONAL	Approved with a condition open
PENDING VALIDATION	Evidence or QA outstanding
REFERENCE	Study only; not a GEM standard

Administrative “N/A — NOT ADOPTED” items must not appear in approved-claim filters. An unapproved claim is unavailable for public use.

PROPOSED · PE-08

Website application and release boundary.

TEMPLATES MAY

- Explain the approach.
- Show disclosed concepts.
- Distinguish package formats.
- Support drafting an enquiry.

THEY MUST NOT IMPLY

- Validated stock or production specifications.
- Programme availability or delivery coverage.
- Successful submission or receipt.

FIVE SEPARATE DECISIONS: NONE GRANTED BY THIS EDITION

Document approval	SKU approval	Image-use approval	Localization acceptance	Publication authorization

Acceptance evidence belongs to the artifact and revision tested. A related build or language layer receives no automatic transfer of QA, font, linguistic or accessibility acceptance.

PROPOSED · PE-13, PE-14 (WEBSITE)

PROPOSED · PE-16, PE-17 (DECISIONS)

Reviewers and final approvers.

REVIEW AREA	REVIEWER	FINAL APPROVER
Identity, templates, assets	Design Custodian	Within recorded asset responsibility; Brand Owner for release
Offer scope and claims	Commercial Lead; Legal / IP Counsel as applicable	Brand Owner for offer scope; Legal/IP clearance separate
Range and product data	Product / Amenities Lead	Route to be confirmed; not delegated here
Supplier evidence	Procurement / Supplier QA	Route to be confirmed; not delegated here
Digital implementation	Digital Design Lead; Engineering Lead	Design Custodian + Digital Design Lead sign-off; Brand Owner for release
Arabic and access	Arabic / Localization Lead; Accessibility QA	Native specialist acceptance; Brand Owner for release
Deck and PDF integrity	Presentation / Document QA	Brand Owner for final issue

The Brand Owner authorises strategy, architecture and final release. Review responsibility does not imply delegated authority to amend master rules. Named role holders are not yet recorded.

Supporting records: exact revisions bound by SHA-256.

Register check: PE-01 to PE-20 exist in the supporting records. PE-21 to PE-27 appear in this deck but are not yet registered. Register them, or revise the tags, before review. The records changed during review (14:00–14:04), so re-bind these hashes at release.

Release checklist and open items.

BEFORE ANY RELEASE

- Record the content decision and the exact issue it applies to.
- Assign the document ID, issue version and named role holders.
- Resolve or retain every affected evidence restriction.
- Confirm cross-document consistency (VAL-21).
- Approve the editable deck and matching PDF after full visual and font checks.
- Bind deliverables to a checksum manifest; obtain separate publication authorization.

THREE SEPARATE DECISIONS ON COLOUR-CODED LABELS

Visual-direction approval	Master-guideline amendment (V3.1 route)	Production-artwork approval

Each is a separate decision. Approving one grants none of the others. The chat approval of the bright-label direction is visual-direction approval only.

OTHER OPEN ITEMS

- Bar Soap: source for the title-case application.
- Supplier data: dimensions, resin, pump, label stock, fit proofs.
- Standards and Saudi label rules: reviewer verification.
- Arabic terminology and native review.
- Document ID, version, role holders.
- Register PE-21 to PE-27.
